Why us?

What sets us apart

For many neurodivergent young people, forming in-person friendships can be incredibly difficult, especially when their only social interactions have ever been online.

At Together We Can International (TWCI), we're changing that narrative. Our social supports are carefully designed and facilitated to empower neurodivergent individuals to connect, grow, and truly belong. Every detail is intentional, from how we match participants with like-minded peers, to how we deliver activities that spark genuine, organic interactions without pressure or pretence.

Sessions are led by experienced, neuroaffirming mentors who create safe, supportive environments where friendships form naturally, boundaries are respected, and confidence can thrive. Every week, we see young people move from isolation to connection, building real friendships and finding their place in the world.

Whether you're a parent, caregiver, educator, or NDIS professional, you can trust TWCI to deliver social support that combines heart, structure, and meaningful outcomes.

Because when young people feel safe and seen, connection happens naturally, and that's when confidence truly begins.

Together we achieve more.

"Together, we can belong, grow, and thrive."
